

Your mission is to ensure public airwaves are used to the fullest extent to promote communications and awareness in the public's interest. Limiting XM radio in response to pressure from the NAB is contrary to that mission. It is the goal of every business interest to eliminate competition. NAB and its members are no different.

In the interest of competition, an informed public and the overall good of America, I urge you to reject NAB's petition 04-160 with prejudice.
